

C++ Special Member Functions: Valid Usage of =default, =delete, =0

Member Function	= default	= delete	= 0 (pure virtual)	Notes
Default Constructor	Yes	Yes	No	Used for object creation: MyClass() = default;
Copy Constructor	Yes	Yes	No	Disables copying: MyClass(const&) = delete;
Move Constructor	Yes	Yes	No	Enables move semantics: MyClass(MyClass&&) = default;
Copy Assignment Operator	Yes	Yes	No	Disables assignment: operator=(const&) = delete;
Move Assignment Operator	Yes	Yes	No	Move assignment: operator=(&&) = default;
Destructor	Yes	Yes	Yes	Use virtual ~Base() = 0; to make class abstract.
Any Member Function	No	Yes	Yes	Functions can be deleted or pure virtual (if virtual).
Non-member Functions	No	Yes	No	Can be deleted but not default or pure virtual.
