

Functions in <unistd.h>

Process Control

fork(), execve(), execl(), execl(), execlp(), execv(), execvp(), execvpe(), getpid(), getppid(), getuid(),
geteuid(), getgid(), getegid(), setuid(), setgid()

File I/O

read(), write(), close(), lseek(), fsync(), dup(), dup2(), pipe()

Working Directory

chdir(), getcwd()

File and Directory Access

access(), unlink(), rmdir(), link(), symlink(), readlink()

Standard Descriptors

STDIN_FILENO, STDOUT_FILENO, STDERR_FILENO

Sleep and Timing

sleep(), usleep(), alarm(), pause()

System Info

sysconf(), pathconf(), confstr()

Miscellaneous

_exit(), isatty(), ttyname(), ftruncate(), truncate(), gethostname(), sethostname()
